Came's for the United States Army . 11 will be recallected that by a recent act of Congressa certain entount was appropriated to enable the Secretary of War to try the experiment of introducing camels on this continual as bearing of birders und for military purposes. As the Navy Depurtment have occasion to send stores to our squadron in the Mediterraneau, the storeslip Supply, now at the New York Yard, has been selected for this purpose, and on her return veyage will bring the camele --This vessel will be commanded by Lious, DAVID D. PORTER, of the pavy, and will lake out Major WAYNE, no officer of the Quartermaster's department of the army, to purchase the camels, and on her homeward voyage will bring them to the United States. The vessel will be prepared with all dispatch for sea. There is no doubt that the experiment of introducing camels as beasts of burden and for military purposes in the South western part of the country will prove entirely successful. Their great endurance, ability to carry large buden-, and the length of time that they are enabled to exist without water will render them a valuable adjunct to the army in the section of country for which they are intended,-Union.

LAUSCH-STEAMER SEBASTOPOL-Saturday, as we learn from the Clevelana Herald, this new steamer "glided from the ship-yard of Chisholm, Morison & Moses into the water. Her length of keel is 230 feet; breadth of heam 30 feet; depth of held 12 feet 6 inches; capacity 840 tons. Sine will not draw over 8 1-2 feet of water when loaded, and is intended for the Buffalo and Chicago currying trade stopping at intemediato ports. Like her namesake in the Crimca, the "Sebustopol" is impregnable, and the elements will bent in vain against her ribs of oak. Her boilers are made by Thoreas J. McGarry. They are cone boilers, eight feet and eight inches in dismeter and eighteen feet high. They are the first, we understand, ever used in steamboats."

Whitewash.-Poor whitewash is a serious injury to'n wall or coiling, and when once on it is difficult to get it off or proporly cover it and produce a clear white appourance. > 0.35 In Orange, N. J., an unpresedented exchement has been created by the clopement of a married man with a young lady of great personal astroctions, and the daughter of one of the richest residents of that place. The gentleman who has thus alssconded has been doing business in New York, and has left a wife and child in Or ange, unprotected and uncared for. Previous to leaving he borrowed of various business men sums to the amount of \$15. 000. Since his residence in Oran e this gentluman has made great pretensions to piety, and has been a lender in evening meetings. Both left notes avowing their determination not to return,

It appears, from an elaborate article in the N. Y. Courier & Inquirer, on the resourses of Russin, that the revenue of that empire Is ever \$300,000 000. The Church, too is enormously rich, and furiously patriotic. Whatever motives Russia may have for desiring peace, lack of the sinews of war is not one of them.

The perfume of flowers may be gathered in a very stimple manner, and without up-paratus. Gather the flowers with its little stocks as possible and place them in a jar three parts full of almoud or clive oil. After being in the oil twenty-four hours, put them into a coarse cloth, and squeeze th oil from them. This process, with fresh flowers, is to be repeated according to the strength of the perfume desired. The oil being thus thoroughly perfumed with the volatile principle of the flowers, it is to be mixed with an equal quanity of pure rectified spirit, and shaken every day for a forinight, when it may be poured off ready for use. As the season for sweet scented blossoms is just approaching, this method may be practically tested, and without any gifat tomble or expense. It would add additionul interest to the cultivation of flowers .-Philadelphia Ladger.
